Crossing the Border

- Answers Are Always Outside Your Scope -

Description: Global issues contain problematic headlines such as poverty, medicine, environment and disaster prevention. To solve this, a trans-border approach across specialized fields through collaboration is required. However, students have limited chances to obtain these skills during their academic years. Therefore, we plan to have lectures by invited speakers on the methods and success. Also, a networking event will be held to ignite collaboration between students. This session aims to provide a valuable chance for students to re-observe their own studies from a different angle and enhance collaborative networking in the younger generation.

Part I	Lecture Session	Chair: Haojun Xu, University of Tsukuba
14:00-14:45	Dr. Kunihiro KITANO "My Experience Indicates That Researchers Need To Be Interested In Various Research Fields."	Northern Advancement Center for Science and Technology
14:45-15:30	Dr. Shinji FUKUDA "Brown Ocean Strategy: How To Create A Disease-free World"	Keio University
15:30-15:40	Coffee Break	
Part II	Workshop	Chair: Yuki Tsunakawa, University of Tsukuba
15:40-16:55	This workshop will allow the participants to practice the techniques that they learnt from the lecturers by grouping with people from various backgrounds. We will be preparing a situation that realistically simulate a collaborative relationship.	
16:55-17:00	Closing
